

I dischi freno RACE MAX fabbricati in ghisa lamellare di alta qualità con contenuto di carbonio grafítico. Sono lavorati con forature e baffle a C per ridurre la rumorosità aumentando nel contempo le prestazioni. Le forature vengono eseguite in modo che non interferiscano mai, nei modelli autoventilanti, con le strutture interne evitandone così l'indebolimento. Tutte le parti del disco che non sono a contatto con la pastiglia sono verniciate con pittura epossidica bi-componente resistente alle alte temperature per preservarle dall'attacco della ruggine. La finitura diamantata delle parti soggette ad attrito conferisce ai dischi freno Race max una perfetta planarità ed un gradevolissimo aspetto estetico.

Les freins à disques RaceMax sont fabriqués en alliage fer lamellaire/carbone graphite de haute qualité. Ils sont perforés et usinés avec des rainures en forme de « C » pour réduire le bruit tout en augmentant les performances. Dans les modèles auto-ventilés les perçages sont effectués de manière à ne pas modifier les structures internes, et éviter des possibles affaiblissements. Toutes les parties du disque qui ne sont pas en contact avec les plaquettes de freins sont peintes avec une peinture époxy à deux composants résistant à des températures élevées pour les protéger des attaques de la rouille. La finition « diamantée » des pièces soumises au frottement donne aux disques de frein RaceMax une parfaite planéité et une esthétique très agréable.

RaceMax brake discs are made of high quality lamellar cast iron with a graphitic carbon content. They are drilled and machined with C-shape grooves to reduce noise while increasing performance. In the self-ventilated models, the ventilation holes are drilled in a way that never interferes with the internal structure thus avoiding any potential weakening of the disc. All parts of the disc that are not in contact with the brake pad are painted with high-temperature resistant bi-component epoxy paint to protect them from the onset of rust. Any parts subject to friction are given a diamond finish, resulting in RaceMax brake discs with perfect flatness and an esthetically pleasing appearance.

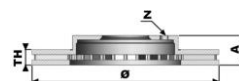

RaceMax Bremsscheiben sind produziert aus extrem hochwertigem Lamellengusseisen bestehend aus Graphitkohlenstoffgehalt. Mit speziellen Bohrungen und „C“-Rillen hergestellt, sind RaceMax Bremsscheiben dafür ausgelegt, bei erhöhter Leistung den Lärm zu verringern. Bei selbst belüftenden Modellen führt die Anordnung dazu, daß es keine störenden Einwirkungen gibt, die zu einem Festigkeitsabfall führen könnten. Alle Teile der Bremsscheibe die nicht in Kontakt mit dem Bremsbelag kommen, sind mit Zweikomponenten-Epoxid-Lack behandelt -resistent gegen hohe Temperaturen- um vor Angriffen von Rost zu schützen. Das Diamant gefräste Finish von Reibungsfreien Teilen gibt den RaceMax Bremsscheiben eine absolut plane Oberfläche und ein angenehmes ästhetisches Aussehen.

Los discos freno RACE MAX fabricados en hierro fundido laminar de alta calidad con contenido de carbono grafítico están elaborados con perforaciones y ranuras de C para reducir el ruido aumentando, a la vez, su rendimiento. Las perforaciones se efectúan de modo que no interfieran nunca, en los modelos autoventilantes, con las estructuras interiores para que no se aflojen. Todas las partes del disco que no están en contacto con la zapata están barnizadas con pintura epoxídica bicomponente resistente a las altas temperaturas para protegerlas contra la herrumbre. El acabado diamantado de las partes sujetas a rozamiento confiere a los discos freno Race max una perfecta planeidad y un aspecto estético muy agradable.

Dischi freno baffati e forati con dimensioni originali Grooved and drilled brake discs with original dimensions
